DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to applying energy minimization, classified in class 382, subclass 260.
 - II. Claims 7-31 drawn to individual difference multidimensional scaling, classified in class 382, and subclass 277.
 - III. Claims 32-36, drawn to time varying signal data, classified in class 382, subclass 280.
 - IV. Claims 37-43, drawn to determining dimensional and reconstruction of networks, classified in class 382, subclass 158.
2. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as only classifying data, invention II has separate utility such as performing multiple processes, such as using individual difference multidimensional scaling to perform data compression, optical and classifying data, invention III has separate utility such as processing time varying signal, invention IV has separate utility such as determining dimensionality of a network. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III and IV, restriction for examination purposes as indicated is proper.
